

## Quality Engineer

J&E Precision Tool, Inc. has an immediate opening for a full-time quality engineer to ensure our parts and processes meet the rigorous demands of the aerospace industry. The quality engineer will be responsible for developing process plans by reviewing customer purchase orders, blueprints, and specifications, will investigate non-conformances, troubleshoot processes, and communicate issues and findings to our customers, and will compile and review documentation packages prior to shipment. Through these activities, our quality engineers form a critical link between our manufacturing, inspection, and customers.

We are a rapidly growing, ISO9001/AS9100 registered company looking for someone like you:

- Experience in machining or manufacturing industry is preferred.
- Ability to interpret blueprints is required.
- Computer skills are required, especially Microsoft Excel.
- Must be organized and detail oriented.
- Must have excellent communication skills, a positive attitude and be reliable

We offer a competitive salary based upon experience and a generous benefits package (including: Medical Insurance, Dental Insurance, 401k plan, vacation) – Come join our team by applying in person at J&E Precision Tool, Inc, 107 Valley Road, Southampton, MA 01073 or on our website:
